

Food in Eco Network – internationalization and global competitiveness
of European SMEs in Food and Eco Logistics Sector

FOODNET

Do you represent food or eco-logistics cluster or business organization?
Would you like to enter and explore the international marketplace?

Join the Alliance!

We kindly encourage you to join our **Food In Eco Network** open free-of charge Partnership – the structure we have created to support clusters and their members in increasing their competitiveness.

Do not hesitate to send us an e-mail to: office@foodnet-project.eu

What can we offer?

- Cooperation with partners representing the same sector helping you to **uptake third markets easier and faster**; assistance from supporting institutions.
- Improved **feasibility for networking, business collaboration and internationalization** with complementary companies / clusters from other EU and non-EU countries.
- Establishment of **micro consortia for projects** co-financed from other sources, possibility of **acquiring co-financing** for internationalization activities which is the key objective of FoodNet project.
- Visibility of the cluster competences, including among others **promotion** of your products and services on the FoodNet web page and our social media channels.
- **Online and face-to-face trainings courses** (trainings modules available already in May 2019!) with the aim to provide our members with the most essential tools to facilitate the management of internationalization activities and thus enhance expansion and business growth.

Food in Eco Network – internationalization and global competitiveness of European SMEs in Food and Eco Logistics Sector

What is FoodNet?

FOODNET is an EU wide meta-cluster supporting CLUSTERS and BUSINESS NETWORK ORGANIZATIONS, their SMEs and other cluster members collaborating for innovation, market-uptake, and marketing of competitive products, services and technologies in the field of food and eco-logistics and support SMEs in global competition.

FOODNET addresses the needs in the area of cooperation and improving green behaviour in supply chain of food clusters and other industry clusters. To assure the quality and safety of food products an effective network oriented on long-term goals and supported by good logistics system is created.
